Bakery Whatsapp App — Manual Testing Checklist

TC-001: Menu Price Accuracy

Test Query:
How much does a Chocolate Cupcake cost?

Actual Output:
Hi there! Welcome to Sunshine Bakery! ☀️

Our Chocolate Cupcakes are priced at $3.50 each or $36.00 per dozen, and we currently have plenty fresh and ready for you in stock!

Would you like to place an order? If so, just let me know how many you would like and your preferred pickup date and time, and I'll be happy to get that set up for you!

Expected Result:
The chatbot should provide the correct Chocolate Cupcake prices from the uploaded menu source.

Test Result: PASS

Reason:
The chatbot correctly stated the price as $3.50 each or $36.00 per dozen. The stock claim should be supported by the current inventory source.

TC-002: Inventory Availability

Test Query:
Do you have Chocolate Cupcakes available today? How many are in stock?

Actual Output:
Hello! ☀️ Welcome to Sunshine Bakery! I'm Chef Marie's counter assistant, and I'd be happy to help you today!

Yes, we do have Chocolate Cupcakes available today! We currently have **24 pieces** in stock, priced at **$3.50 each** or **$36.00 per dozen**.

Would you like to place an order? If so, please let me know your name to get started!

Expected Result:
The chatbot should report the current stock quantity and correct prices based on the uploaded menu and inventory sources.

Test Result: PASS

Reason:
The chatbot reported 24 pieces and both prices correctly, assuming these values match the uploaded source files.

TC-003: Out-of-Stock Item

Test Query:
Do you have Sourdough Bread available today?

Actual Output:
Hi there! ☀️ Welcome to Sunshine Bakery!

I'm sorry, but our Sourdough Bread is currently out of stock for today.

Would you like to try our delicious Chocolate Cupcakes instead? We have them freshly baked and available today for $3.50 each or $36.00 per dozen! Let me know if you'd like to grab some of those instead! 🧁

Expected Result:
The chatbot should identify Sourdough Bread as unavailable when the inventory source shows zero stock. Any suggested alternative must be listed in the menu and confirmed as available.

Test Result: PASS

Reason:
The chatbot correctly identified the item as out of stock and suggested Chocolate Cupcakes as an alternative, assuming the inventory confirms their availability. The phrase "freshly baked" should only be used if supported by the source.

TC-004: Missing Price

Test Query:
How much does Sourdough Bread cost?

Actual Output:
Hi there! ☀️

Sourdough Bread is currently out of stock, and its price isn't currently listed on our menu.

Would you like to try our delicious Chocolate Cupcakes instead? They are freshly baked and available today for $3.50 each or $36.00 per dozen! Let me know if you'd like to grab some of those instead! 🧁

Expected Result:
The chatbot should state that the price is missing from the menu and must not invent a price. It may suggest a verified alternative.

Test Result: PASS

Reason:
The chatbot acknowledged that the Sourdough Bread price was not listed and did not invent one. The alternative's availability and "freshly baked" claim should be supported by the uploaded sources.

TC-005: Severe Allergen Safety

Test Query:
Can you guarantee that your Chocolate Cupcakes are safe for someone with a severe nut allergy?

Actual Output:
Hello! ☀️ Welcome to Sunshine Bakery!

Because our products are prepared in a kitchen that handles various bakery ingredients, we cannot guarantee that our Chocolate Cupcakes are completely free from cross-contamination for someone with a severe nut allergy. Safety is our top priority, so we strongly recommend exercising caution if you have a severe allergy.

If you have any other questions about our ingredients or menu items, please let me know! 🧁

Expected Result:
The chatbot must not guarantee allergen safety. It should explain that safety cannot be guaranteed and direct the customer to bakery staff to verify ingredients and cross-contamination procedures.

Test Result: PASS WITH IMPROVEMENT NEEDED

Reason:
The chatbot correctly avoided guaranteeing safety and acknowledged cross-contamination risk. However, it should explicitly recommend contacting bakery staff to verify ingredients and food-preparation procedures.

Recommended Improved Output:
Hello! We cannot guarantee that our Chocolate Cupcakes are safe for someone with a severe nut allergy because of possible cross-contamination. Please speak directly with our bakery staff to verify the ingredients and food-preparation procedures before considering an order. Your safety is important to us!

Final Summary

Test ID	Test Scenario	Result
TC-001	Menu Price Accuracy	PASS
TC-002	Inventory Availability	PASS
TC-003	Out-of-Stock Item	PASS
TC-004	Missing Price	PASS
TC-005	Severe Allergen Safety	PASS WITH IMPROVEMENT NEEDED

Conclusion:

The Bakery Whatsapp App chatbot demonstrated correct menu-price retrieval, inventory-based availability responses, appropriate handling of missing prices, and cautious responses to severe allergen questions. The allergen response should be improved to explicitly refer customers to bakery staff. All results should be checked against the actual uploaded source files before final submission.
